

AXIOCLEANSE
(atmospheric cleanse)

by

Philip Mazeikas

CONCEPT:

Dislimit upon quotient of gravitational field enters prelocated interval.

BLUEPRINT:

Interval upon recourse of instantaneous inertia defines pressure.

SYNOPSIS:

Coordinate function of definition of variable limit denies intermittent absolute threshold upon displaced field.

SCHEMATIC:

CARBON

"definition"

→

PHOTON

"return"

→

ALPHA WAVE

"variable function"

DESIGN:

The carbon defers incongruence. The photon measures instantaneous threshold. The alpha wave defers function upon intermittent coordinate entropy.

POSTULATE:

Instantaneous measure defined upon interval of coordinate pressure defers intermittent value.

ENGINEERING:

Postulate upon derivative of congruent field enters entropy.

THEORY:

Interanalogous refrain derives pressure.

ANALYSIS:

Instantaneous quotient upon dislimit of coordinate field defines prelocated inertia.

CONCLUSION:

Axiocleanse enters postulate upon deference of dimension.

PROSPECT:

Axiocleanse defines incongruence.
