

LAW ENFORCEMENT CALIBRATION

by

Philip Mazeikas

Deposition upon refrain of stasis upon inordinate variable denotation enters coordinate function.

Law reposed upon instantaneous measure of indivisible limit of statute denies incongruent axis of interval of refrain.

Inordinate field upon deposed variant postulate upon determined variable threshold of instantaneous directive of intermittent trial denies proximate recourse.

Threshold upon indivisible measure of inert sequential frequency of determined axis of statute denies inordinate function of analogous designation upon instantaneous coordinate field.

Interval upon analogous derivative of measure upon definition of Law enters prerequisite function of determined value.

Interposition upon determined variant limit of instantaneous frequency of inert coordinate axis of recourse defines intermittent juncture upon designated threshold of coordinate function.
