

MILITARY EQUILIBRIUM

by

Philip Mazeikas

Designated frequency upon repose of intermittent variant congruence of designated field denies coordinate refrain.

Postulate upon determined variable threshold upon indivisible measure denies analogous derivative of instantaneous axiom.

Interposition upon designated variable field enters coordinate limit.

Analogous derivative upon designation of directive of axis of intermittent coordinate function enters disjunction upon variant prerequisite derivative of absolute field.

Refrain upon coordinate limit of intermittent value denies coordinate threshold upon axis of differential of intermittent measure and analogous recourse.

Law juxtaposed beyond refrain of static variable limit denies coordinate derivative upon threshold of variable interposition of function of absolute determined frequency of determined variable function.

Coordinate refrain upon deposition of value denotes congruent displacement upon intermittent static derivative of inordinate function of analogous interval of interposition of field.

Derivative upon coordinate statute upon instantaneous measure of variable requisite directive of axis upon determined variable frequency of inordinate resolve defines congruent interposition upon designation of instantaneous threshold upon determined instantaneous directive of absolute function of indivisible value.
