

RQV
(infinite battery)

by

Philip Mazeikas

CONCEPT:

Differential of absolute metric of volume, in intrinsic wave form of quotient upon return of electromagnetic variable fission of atomic distinction of nuclear field, enters measure.

BLUEPRINT:

Distinction of mass, in conjunction of metric, enters variable.

SYNOPSIS:

Process, in absolute variable limit, disjoined upon atomic mass, enters preliminary value.

SCHEMATIC:

MAGNET

"disjunction"

→

ALPHA WAVE

"return"

→

GYROSCOPE

"pressure"

→

HERTZ

"stasis"

→

DECIBEL

"value"

DESIGN:

The magnet disjoins variable limit upon atomic value. The alpha wave measures inversion. The gyroscope denies threshold of variable nuclear measure. The hertz measures derivative of pressure. The decibel enters premeasure upon concordance of fission.

POSTULATE:

Process in intermediary value, denies mass.

ENGINEERING:

Selective appropriation of function of dislimit of field, denies not.

THEORY:

Process in absolute value, enters distinction.

ANALYSIS:

Process in affirmative pretense of variable limit, denies nuclear mass.

CONCLUSION:

RQV denies mass, upon distinction of variable mass.

PROSPECT:

RQV enters intermediary quotient of force, in metric of conjunction of variable mass and intrinsic inertia.
