

## PROJECT SQUAD

By

Philip Mazeikas

### WAR DRUM (supersonic frequency inertia)

Dislocated variance, upon intonation of hertz magnitude of composite of return of intermediary function of neutronic inert dissolution of gravitational entropy, returns inordinate value upon intonation of variable composite of static threshold.

### TEAR GAS (biochemical affect)

Intrinsic mass, upon composite return of variable atomic disjunction of pressure, in variable composite of inordinate threshold upon internment of caliber of electromagnetic variable fission of nucleic field, enters entropy.

### BLINDING LIGHT (electromagnetic pulse)

Pressure, in influx of measure, upon denotation of intrinsic caliber of function of stasis upon function of intermediary entropy, inverts.
