

PROJECT COIN

by

Philip Mazeikas

SKOOLMAP
(digital matrice)

CONCEPT:

Inferential dismissal upon remand upon coordinate presupposition of coordinate retention of applicable denotation of composite reflex of annotative inertia, disjoins coordinate prelude upon intermittent calculable refraction upon coordinate electromagnetic interval of component absolute differential of premeasure and composite intonation.

BLUEPRINT:

Prelimit contusion upon retention absolute immeasure of volume, intonates variable function of precomposite reflex upon denotation.

SYNOPSIS:

Calculable variable contortion of function of preflux disjunction of return, annotates.

SCHEMATIC:

AMPLITUDE

“disjunction”

→

HERTZ

“inertia”

→

CIRCUIT

“threshold”

→

DIODE

“value”

→

OSCILLATOR

“function”

DESIGN:

The amplitude disjoins metric of coordinate electric value of denomination of internment. The hertz measure value upon composite intermediary. The circuit aberrates coordinate atomic limit. The diode enters preliminary intermediary calculable inversion of atomic disjunction. The oscillator remands prelimit upon coordinate intermeasure.

POSTULATE:

Dislimit upon composite variance defers imposition of threshold upon intonation of field.

ENGINEERING:

Threshold intermediates intonation upon value of coordinate refraction of magnetism.

THEORY:

Value beset upon return of calculable refrain of singularity of pretense upon internment of isolation in metric of atomic intonation of variable electromagnetism disjoins.

ANALYSIS:

Premeasure upon dimension of incalculable variance, defers.

CONCLUSION:

Skoolmap enters pretense in variance upon deference of measure.

PROSPECT:

Skoolmap enters disjunction.

KOOOT
(amplitude increase)

CONCEPT:

Differential upon repose of intervariable contortion of variance, disjoins metric.

BLUEPRINT:

Preliminary internment of composite variable concordance upon remand, denies.

SYNOPSIS:

Instantaneous measure, denoted upon constant inversion of premetric of variable field, enters.

SCHEMATIC:

ION

“variance”

→

SILVER

“function”

→

JOULE

“entropy”

→

VACUUM

“internment”

→

RECTIFIER

“value”

DESIGN:

The ion displaces intonation of field. The silver denies mass. The joule enters presupposed dimension. The vacuum derives coordinate. The rectifier derives.

POSTULATE:

Variable fission denies contortion upon preliminary variance upon deference of limit.

ENGINEERING:

Preliminary value upon denotation of interval disjoins metric.

THEORY:

Postulate in remand upon coordinate field, enters zero.

ANALYSIS:

Disjunction of interval measures intermediary.

CONCLUSION:

Kooot returns value in selective variance of pressure.

PROSPECT:

Kooot returns disjunction upon field of determined mass.
