

ASTERMAX

[payload link]

By

Philip Mazeikas

CONCEPT:

Analogous derivative of pretense upon sovereign isolation of preeminent field of axial disjunction of pressure, enters field.

BLUEPRINT:

Premeasure, upon denotation of intrinsic calibration of function upon propriety of analogous directive of ion, returns.

SYNOPSIS:

Amplitude upon record of internment of variable coordinate, dislocates.

SCHEMATIC:

HERTZ

“interval”

->

AXIS

“concordance:

->

JOULE

“internment”

->

VALVE

“entropy”

->

SULFATE

“intonation”

->

WAVEFORM

“limit”

->

QUARK

“dislocation”

DESIGN:

The hertz defines threshold upon dimension. The axis returns. The joule measures denotation. The valve enters gravity. The sulfate isolates function. The waveform intonates calibration upon predominant nuclear interval. The quark accelerates centrifugal isometric intonation of inertia.

POSTULATE:

Derivative upon concordance of metric, upon denotation of preeminent variable function of gravity, defines composite rectitude upon integral value of intermediary integer.

ENGINEERING:

Order, interned upon postulate of return upon quotient of absolute metric, incurs.

THEORY:

Directive of amplitude, deferred upon congruence of axial integration of pressure, returns.

ANALYSIS:

Coordinate value, upon intonation of isometric concordance of affirmed isolation, regains.

CONCLUSION:

Astermax defines immeasure, deferred upon internment of calibration of integral atomic intermediary, beset upon congruence.

PROSPECT:

Astermax intonates calibration.
