Philip Mazeikas

Interposed velocity, in congruence of natural constant of ionized internment of variable isolation of wave return upon threshold of magnitude of isolated material sin oscillation of juncture upon constant of gravitational refraction joule pique of absolute nuclear incongruence, intermediates variable limit upon conjunction stasis of derived pressure in atomic dissolution of material constant of refraction upon denotation of frame.

Time, in limit, upon conjunction of absolute metric of ion distinction of proper allocated variable disjunction of field and isolated mass, denotes interval upon coordinate pretense of variable symmetry of stasis in congruent limit of denotation upon pretense of coordinate atomic dimension of pressure.

Light, in amass, upon denomination of field, upon interval of stasis, in refraction, upon distinction of material accord in immeasure upon constant of universal integer of pressure, in atomic disjunction of pressure and time, enters dimension.

Gravity, in celestial predominance upon coordinate injuncture upon accord of atomic mass, in derivative upon pretense of caliber of function of nuclear distinction of return of pressure, in animate disjunction of field and time, returns.

Selective field, in remand of pretense of acceleration upon protonic distinction of isolation in material variable congruence of matter, in axial dislocation of interval of universal mass, denies variance upon coordinate pretense of accord of gravity, in predominant variable coordinate ion of refraction in distinction of field, upon coordinate intonation of amplitude of nuclear isolation of material variable limit of isolated mass, upon record of time, in absolute variance upon dislocation of universal integer of hydrogen constant intonation of function of calculable force, upon resolution of intermediary calculable function of absolute pique of refraction of universal square residual polarity of symmetrical analogous joule of isolated material wave.

Constant, in dislocation of variable limit of isolated material amplitude of nuclear retention of mass, intermediates variable distinction of accord.

Predominant variable intonation, of field, upon disjunction of mass, in intonation of measure upon coordinate derivative of neutronic availability of dimension, records internment, upon constant of distinction of variable time, upon constant of return.

Pressure, in absolute, upon interval, of refraction, upon denomination of field, intermediates congruent wave, disjoined upon polarity of nuclear field, in isolation.

Universe, in gravitational metric of absolute ion, in dislocation of material vestige of coordinate pretense of accord of hertz polarity of function of material entropy, regains.

Polarity, in denotation of pretense of available coordinate internment of constant of atomic regain of available material inertia, upon regain of absolute metric of velocity, determines one.

One, in metric of field, upon denotation of absolute inertia, upon coordinate availability of alpha distinction of material function of protonic disjunction of selective beta retention of ionic field, defers.

Field, in universal measure, upon gravitational inert Cambrian dislocation of material refraction of interval of stasis of hertz cosine internment, resolves.

One, in constant of variable mass, disjoined upon pressure in atomic record of animate intermediary of variable limit, enters.
