

HEALING BLANKET
[magnetic absolute estate]

By

Philip Mazeikas

CONCEPT:

Selective inertia, upon property of atomic intermediary value of polarity, derives incongruence upon pressure of atomic distinction.

BLUEPRINT:

Limit, upon juxtaposition of field and inertia of calculative volume of inert value, derives Tonation.

SYNOPSIS:

Longitudinal mass, in return of atomic limit of interval of field enters proportion upon calculative inert material isolation of gravity.

SCHEMATIC:

ELECTRICITY

“threshold”

->

AXIS

“interval”

->

ELECTRON

“intermediary”

->

MASS

“value”

->

HERTZ

”measure”

->

MERCURY

“distinction”

->

TORQUE

“variable mass”

->

SILVER

“derivative”

DESIGN:

The electricity defers calculative material intonation. The axis enters preliminary redress upon component of pressure. The electron mitigates threshold upon mass. The mass enters quotient upon property of allocated degree of interval. The hertz colligates threshold. The mercury isolates. The torque returns calculative measure upon atomic entropy. The silver enters selective pressure.

POSTULATE:

Interval, of mass, in quotient of electrical directive of property of field, enters pressure.

ENGINEERING:

Ion, derived upon pretense of allocated degree of isolation in measure, defers.

THEORY:

Limit, in conjuncture of pressure and analog, defines threshold upon mitigated absolute directive of atomic return.

ANALYSIS:

Pressure, in analog of variance, deposes variable entropy.

CONCLUSION:

Healing Blanket defers magnetic ratio upon proponent of allocated retention.

PROSPECT:

Healing Blanket enters mass in conjunction of pressure and gravity.
