

THE BODY RAY

[dissolution field atomic enumeration]

By

Philip Mazeikas

CONCEPT:

Intermediary value, beset upon wave polarity in denial of mass, upon property of exact intonation of pressure, derives.

BLUEPRINT:

Calculative measure, in threshold of atomic intermediary, confers dissolution of interval.

SYNOPSIS:

Selective measure, in interval of absolute pressure, denies metric.

SCHEMATIC:

ION

“threshold”

->

COIL

“function”

->

JOULE

“measure”

->

CARBON

“isolation”

->

ENTROPY

“variance”

DESIGN:

The ion intermediates value. The coil disjoins pressure. The joule denies return. The carbon derives calculative selection of mass. The entropy mitigates variable intonation.

POSTULATE:

Selective mass, in pressure of field, derives conference of return.

ENGINEERING:

Limit, in denial of pressure, disjoins metric of absolute intonation.

THEORY:

Pressure, in concordance of field, determines magnitude.

ANALYSIS:

Derivative upon pressure, in selective mass of atomic interval calculates variance.

CONCLUSION:

The Body Ray confers directive of measure.

PROSPECT:

The Body Ray enumerates upon field.
