

THE BODY SCANNER

[appropriated calculative mitigation]

By

Philip Mazeikas

CONCEPT:

Postulate, returned in categorical appropriation of metric in solution of function, derives contention in measure of ionic resolve.

BLUEPRINT:

Internment, upon proponent of categorical axis of function, derives isolation in measure of force in proponent of calculative threshold of mass.

SYNOPSIS:

Limit, in axis of derived field, denies ion, in measure, upon proportion of absolute denotation of metric.

SCHEMATIC:

DIODE

“axis”

->

WAVE FUNCTION

“threshold”

->

ATOM

“longitudinal variance”

->

GRAVITY

“deference”

->

NUCLEAR WEAK FORCE

“disjunction”

->

MEGAWATT

“postulate”

->

NITROGEN

“variance”

DESIGN:

The diode enters measure. The wave function isolates. The atom disjoins absolute pressure. The gravity defers incongruence. The nuclear weak force interns variable isolation. The megawatt denies intonation. The nitrogen derives field.

POSTULATE:

Internment, upon isolation of pressure, in atomic measure of isolation in threshold of mass, defers.

ENGINEERING:

Pressure, in congruence upon proponent of axial dissolution of field, enters.

THEORY:

Longitudinal metric, in variance upon property of axis, defers derivative upon pressure.

ANALYSIS:

Isolation, in field, upon measure of atomic mass, denies variable intonation.

CONCLUSION:

The Body Scanner isolates metric upon proponent of field.

PROSPECT:

The Body Scanner interns measure.
