

THE BAD THEORY

BY

PHILIP FRANCIS MAZEIKAS

I read a Published Science Theory.....

It read:

“THE BRAIN EXCREETS DOPAMINE WHEN IT IS EXPECTING A REWARD”

The lapse in reason, is recognized in the time of affirmation, in the pretense of Brain and condition of Property of condition, in the sign of the reason of accord between Dopamine and tense of Body Organ.

The condition of Dopamine, is conferred by intermediary of lapse of cognition, in record of sign of accord between lapse of condition, and reason of stimulus.

The definition of condition, is recurred into tense of condition, in lapse of Brain intermediary for condition of cause, and in tense of internment of condition.

The lapse of condition, in tense of stimulus and refrain of selection of material record, defines tense in condition of refrain of condition.

The reason in condition is the lapse of function, in tense of stimulus, and record of stimulus, in condition of refrain of condition of record, in terminology of function of lapse in anatomical condition of stimulus and condition.
