

THE KILL TO COVID

BY

PHILIP FRANCIS MAZEIKAS

Neural intermediary constant of incursion of threshold upon lipid congruence in diametric equity of vascular isolation in membrane contusion of field, in recurring variance of internment of entropy in amplitude of retention of thyroid, confers incursion into variance of form and instantaneous quotient of variable procured immeasure of isolation of nucleus, in conference of state and determinant of isolation of mitochondria composite of disjunction of field and isolation of retention of cerebellum integrity of property of quotient of mass of neural mediation of singularity of pressure, in conference of status of field, in imminence of variance upon disjunction of threshold of measure and procured isolation.
