

TOTAL RECOVERY
MAZEIKAS

Intermediary pressure, upon coordinate of influx determinant of variable mass, interns calculable field upon retention of variable disjunction of field and intermediary limit of selection.

Pressure, in tonation of variable retention of isolation of selection, incurs gradient in tonation of selection of quotient of variable internment of force, and calculable isolation of pressure.

Limit, in tonation of field, and conclusion of retention of meter of stasis, incurs retention.
