

HOLOCENE EXTINCTION

Philip Francis Mazeikas

Measure in atmospheric entropy of calculable derivative of retention of mass, in concordance of Cambrian internment of force, denotes variable operative limit of concordance of matter, in calculable isolation of retention of instrumental denotation of entropy of calculable disjunction of Earth and mitigated volume of pressure, upon threshold of constant isolation of volume of pressure, in concordance of atmospheric internment of volume of quotient of negative isolation of mass and derivative of entropy.
