

SPACE CONTORTIONISM
PHILIP FRANCIS MAZEIKAS

Joule composite of retention of meter of atomic internment of axis of entropy, confers selection in tense of variable property of axis of inert mitigation of field and pressure, in tonation of variable conference of stasis and immeasure upon denotation of quotient of entropy, in colligated isolation of preeminent variable conclusion of meter of selection of asymmetrical cosine retention of magnitude of atomic interval of pique of inert operative surplus of denominator of resistance towards gravitational meter of aselection of mass of entropy.
