

HOSE X

(derives water live out of the Universe)

PHILIP FRANCIS MAZEIKAS

Negation in entropy of calculable isometry of retention of molecular internment of axis of preeminent volume of hydrogen pique of recourse of animate disjunction of pressure and anatomic quotient of atmospheric sin constant of hertz inertia, refrains selection of composite field of selection of mass and congruence of pressure in anatomic interval of nuclear isolation of molecular isometry of calculable denial of ion of function of quotient of negative pressure, in constant of pique of selection of meter of axis of dislocated interval of pressure and anatomic internment of value of volume of inert atomic retention of mass of absolute retention of mitigated soluble sin intermediary pique of cosine selection of longitudinal negation of colligated inertia of wave polarity of volume, in dislocated pressure of anatomic pique of recourse of hydrogen volume of inert mass of entropy of calculable ion of constant of field of asymmetry of volume.
