

INFINITE WATER
PHILIP FRANCIS MAZEIKAS

Inert molecular retention of amovability of tense of Cambrian prelocated wave concordance of hydrogen and isometric caliber of negative pressure of caliber of deference of solidity of quotient of atmospheric inertia, confers artifice of quotient of amass of negative pressure of imminent caliber of derivative of allocated regress into entropy of calculable atomic internment of artifice of selection of negative meter of solvable irregularity of juncture of pressure and entropy of hydrogen dislocated interval of pique of negative mass and retention of arbitration of kilowatt entropy of calculus of disjoined membrane of molecular inertia and concordance of meter of selection of mass and inert membrane of selection of pressure of anatomic quotient of mass and inertia.
