

THE INFINITE LIGHTER  
PHILIP FRANCIS MAZEIKAS

Molecular negation of field in tonation of variable combustive property of denotation of axis of entropy in gravitational internment of operative quotient of neutronic internment of measure of allocated endurance of inertia, compounds innate retention of allocated membrane oscillation of prelocated axis of negative isolation of meter of concordance of pressure and irregular wave denotation of measure of constant of pique of nuclear recourse of derived axis of entropy in calculable meter of solvable retention of magnitude of volume of negative pique of allocated inert compound of recourse of animate derivative of limit of congruence of pressure in denotation of surplus of wave juncture of pique of dislocated membrane of atmospheric constant.
