

THE INFINITE WATER BOTTLE
PHILIP FRANCIS MAZEIKAS

Molecular isolation of meter of soluble entropy of calculable retention of axial pressure upon tonation of variable isometry of hydrogen quotient of allocated endurance of imminent wave concordance of threshold of anatomic negation of variable atomic meter of pretense of irregularity of quotient of entropy, calculates retention in meter of allocated integer of pressure upon tonation of molecular negation of isometric variance upon tonation of electromagnetic variable dislocation of meter of concordance of mass, and selection of ion in recourse of variable isometry of negation of pique of allocated redress into quotient of internment of calculative value of disjoined pressure of volume and sin entropy of negation of pique of longitudinal variable diameter of congruence of apex of molecular regress into tonation of amyotrophic volume of congruence of selection of negative regularity.
