THE GENETIC BIKE
PHILIP FRANCIS MAZEIKAS

Inert pique of quadratic internment of variable atomic interval of pique of negation of isometric variance of deference of solidity of entropy in calculable pique of allocated integer of location of meter of surplus of alocation of retention of volume, returns calculable isometry in negative meter of selection of internment in variable pique of alocation of entropy in cosine regulation of endurance of pique of ameter of selection of negative internment of variable quadratic retention of movability of tonation of meter of axis of meter.
