

INFINITE GASOLINE TANK
PHILIP FRANCIS MAZEIKAS

Ordinate molecular retention of amovability of tonation of inert pique of arbitration of alocation of electron negation of ionic retention of combustive quotient of amaterial axis of limit of selection of aperture of cosine interval of negative kinetic volume of axis of longitudinal metric of field, confers arbitration in material axis of selective ordinate entropy of calculable retention of ameter of soluble retention of aaxis of limit of congruence of surplus of neutronic quadratic isolation of limit of selective negation of inert pressure upon disjoined axis of nuclear retention of ameter of soluble integrity of volume of mitigated volume of sin integrity of isometric caliber of function of Cambrian isolation of meter of quotient of material joule isometry of volume of integral phosphate internment of regularity of alocation of force.
